Components	Requirements
Operation system additional	Note: if you install a product that contains Progress Explorer, SQL Explorer, or ProxyGen, you must have MS Internet Explorer (MS IE) Version 4.01 or later installed on your system. You can download MS IE version 4.01 or later from www.microsoft.com/ie <ul style="list-style-type: none"> • U.S.A. systems must have Service Pack 5.0 or later • International systems must have the international equivalent to SP 5.0 • The Merant/Intersolv Progress SQL-92 ODBC driver requires SP 4.0 or later
Progress 4GL Client	A Pentium PC (or compatible computer) with a clock speed of at least 200MHZ (400MHZ recommended). 64MB (128MB recommended)
Progress Server	A Pentium PC (or compatible computer) with a clock speed of at least 200MHZ (400MHZ recommended). 128MB (256MB recommended)
Hard disk drive	Sufficient disk space to hold the Progress software and SAM programs and databases you want to install. (Recommended min.10GB)
Disk Space	Sufficient disk space on the drive where Windows (XX) is installed for windows system files that Progress copies there. Depending on which Windows system files are already installed on your system, Progress can install up to 10 MB on your Windows directory.
Workstation/Server	Microsoft Windows NT Workstation or Windows NT Server version 4.0
CD-ROM	A CD-ROM drive

SYSTEM REQUIREMENTS Windows Millennium	
Components	Requirements
Operation system	Windows Millennium
Progress 4GL Client	A Pentium PC (or compatible computer) with a clock speed of at least 100MHZ (200MHZ recommended). 32MB (64MB recommended)
Progress Server	A Pentium PC (or compatible computer) with a clock speed of at least 200MHZ (400MHZ recommended). 64MB (96MB recommended)
Hard disk drive	Sufficient disk space to hold the Progress software and SAM programs you want to install. (Recommended min.10GB)
Disk Space	Sufficient disk space on the drive where Windows (XX) is installed for windows system files that Progress copies there. Depending on which Windows system files are already installed on your system, Progresscan install up to 10 MB on your Windows directory.
CD-ROM	A CD-ROM drive

SYSTEM REQUIREMENTS Windows 2000 or 2003	
Components	Requirements
Operation system	Windows 2000 or 2003 workstation or server Note: if you install a product that contains Progress Explorer, SQL Explorer, or ProxyGen, you must have MS Internet Explorer (MS IE) Version 4.01 or later installed on your system. You can download MS IE version 4.01 or later from www.microsoft.com/ie
Progress 4GL Client	A Pentium PC (or compatible computer) with a clock speed of at least 100MHZ (200MHZ recommended). 64MB (128MB recommended)
Progress Server	A Pentium PC (or compatible computer) with a clock speed of at least 200MHZ (400MHZ recommended). 128MB (256MB recommended)
Hard disk drive	Sufficient disk space to hold the Progress software and SAM programs and databases you want to install. (Recommended min.10GB)
Disk Space	Sufficient disk space on the drive where Windows (XX) is installed for windows system files that Progress copies there. Depending on which Windows system files are already installed on your system, Progress can install up to 10 MB on your Windows directory.
CD-ROM	A CD-ROM drive

SYSTEM REQUIREMENTS Windows XP	
Components	Requirements
Operation system additional	Windows XP
Progress 4GL Client	A Pentium PC (or compatible computer) with a clock speed of at least 200MHZ (400MHZ recommended). 64MB (256MB recommended)
Progress Server	A Pentium PC (or compatible computer) with a clock speed of at least 200MHZ (400MHZ recommended). 128MB (256MB recommended)
Hard disk drive	Sufficient disk space to hold the Progress software and SAM programs and databases you want to install. (Recommended min.10GB)
Disk Space	Sufficient disk space on the drive where Windows (XX) is installed for windows system files that Progress copies there. Depending on which Windows system files are already installed on your system, Progress can install up to 10 MB on your Windows directory.
CD-ROM	A CD-ROM drive
